

# Why Evolve Indy is Perfect For New Hampshire Addiction Treatment

## Why Evolve Indy?

Evolve Indy is a reputable, highly-rated addiction treatment center and service provider located in the vibrant city of Indianapolis, Indiana. With over 20 years of experience and 100% client satisfaction, we're proud to offer innovative and individualized treatment plans to help you tackle your addiction and start the road to recovery.

Taking the first step can be scary, but our team of caring and compassionate medical experts will be by your side to make sure you have the maximum support needed to successfully live the life you want and become the person you're meant to be.

## New Hampshire Addiction Treatment Programs provided by Evolve Indy for residents of NH.

We provide both inpatient and outpatient programs and services. Our inpatient residential program will provide you with 24/7 care and may be the best option for you if you have a severe addiction or have sought treatment in the past and since relapsed. Because you will stay in the center overnight, we provide you with housing, meals, and medical care. Almost all of your time will be spent in treatment and therapy.

Our outpatient programs include:

- Partial hospitalization
- Intensive outpatient
- Outpatient treatment

Like inpatient treatment, **partial hospitalization** offers high-intensity treatment but does not require you to spend the night. Once you and your case manager decide you no longer require such a demanding level of treatment, you may be ready to move into one of our flexible outpatient programs. If you're suffering from a mild addiction, inpatient treatment may not be necessary and you may start with one of these outpatient programs instead.

In the **intensive outpatient program** (IOP), you have the freedom to resume daily life but will still attend many hours of group and individual therapy sessions each week. You'll also have the option to live in our men's and women's housing alongside other individuals dedicated to living a sober lifestyle, although this is not necessary to take part in the program.

The regular **outpatient program** may be a great fit for you if you feel ready for more independence. You'll still attend therapy sessions, though they'll be less frequent than those in the IOP.

## Benefits for New Hampshire Residents

As a resident of New Hampshire, attending an addiction treatment center in Indiana might seem inconvenient – especially if there are local treatment centers in your area. Evolve Indy offers benefits to New Hampshire residents that are worth the distance.

### A highly-rated **addiction treatment center in Indiana**

Our programs are developed by people who have been there. They also attended treatment centers and received outpatient services, and have stayed sober long term. The combination of personal experience and expert knowledge has made our programs some of the best and most effective in the country. Our past clients are a testament to this. Thanks to the trust of our hardworking clients, we've achieved status as a 5-star treatment facility.

## Stay focused on your addiction treatment

While being separated from your family and friends to enter an inpatient program at **our treatment center** may be challenging, by removing the stressors and triggers in your daily lifestyle, you'll be able to focus exclusively on your treatment and getting the help you need.

Inpatient programs last between 30 days and six months. Though this may feel like a long time, by dedicating yourself to achieving recovery and long term sobriety, the sacrifice will be worth it. A new environment in a new state may be just what you need to give your recovery everything you have.

## Individualized treatment plans

Every person and addiction is different. This means that there is no single program that will work equally well for all our clients. We use a wide range of therapies, including holistic, traditional, and modern methods. By tailoring services from each of these therapies to your unique needs, we can provide you with the best care possible.

You'll attend group therapy sessions, as well as individual therapy. Our caring and knowledgeable medical professionals take the time to understand your history, personality, and lifestyle so that your treatment plan is tailored perfectly to you. We'll work with you to develop a care plan as you progress through the different stages of treatment. Our goal for you is to gain full independence and achieve long term sobriety, and the best way to do this is to equip you with the skills and tools you need to help yourself.

## Options for a variety of budgets

We strive to keep out-of-pocket expenses as low as possible. Although our inpatient programs are more expensive than outpatient services, this high level of care is sometimes required for you to have the best chance at success. To make treatment more affordable for our clients, we work with a wide range of insurance carriers to help cover your costs. Contact us today for a free consultation and we'll be happy to discuss treatment options and financial plans with you.
